AZOMITE ** Ore – Certificate of Analysis Testing Method was Spark Source Mass Spectrometry

This analysis is what scientists refer to as a "Typical Analysis" (similar to an average analysis) and it is not a "Guaranteed Analysis" from a regulatory standpoint. AZOMITE® is a natural, mined product and we expect some variations in the various elemental components. The analysis is offered for those who wish to know generally what elements are commonly found in AZOMITE® with sophisticated scientific analytical methods.
